Technical Bulletin Material Safety Data Sheet

Truefoam Limited expanded polystyrene (EPS) products for construction applications made from raw materials containing combustion modifier

		Issued: June 2015
Section 1: Product Infor	mation & Company Inform	ation
	t, Truewall, Truefit, Trueroof, Truev Insulworks, Reward Wall, Iceblock	
Synonyms : Expanded Polys	styrene (EPS) foam plastic insul	ation
Product Grad es: CAN/ULC-S	701-97 Trueboard Type 1, 2, and	3
Chemical Fam ily: Ethenylbe	nzene Homopolymer Formul	a : $(C_8H_8)_n$
TSCA Inventory Status: Listed		
Supplier Corporate Office: Truefoam Limited 11 Mosher D rive Dartmouth , Nova Scotia B3B Technical Information: (902) 4		
Section 2: Composition/	ngredients	
<u>Comp onent:</u> Pentane Flame Retardant Coatings Polys tyrene The rmoplas tic	<u>CAS Registry No:</u> 109-66-0 3322-93-8 N/A 9003-53-6	Approx. Weight Percentage: 0 to 1 % am oun ts rapidly decreasing with age 0.9% max. 0.5% max. 98 to 99%
Component Related Regulato	ry Information:	mation identified as the following: Nuisance
Comp onent Inform ation/Infor additional information available.	mation o n Non-H azardous C o	mpo nents : No
Section 3: Health Hazard	S	
Eye Contac t: Dus t or particles Inhalation: Dust from mechanic wire cutting can also cause uppe Skin Contac t: Irritation from sk irritation. Ingestion: Product is biological	er respiratory tract irritation (see als in co ntact is rare . In a few ind ivid y inert. If swallowed, it may act as	al eye ir ritation and/ or inju ry. spiratory tract irritation. Fumes from hot so section 8 of this MSDS). duals, con tact m ay produc e slight skin

Section 4: First Aid

Eyes: If dust or particles become lodged in eyes, rinse with clean water. Obtain m edical attention if cond ition is painf ul.

Inhalation: If overcome by exposure, remove individual to fresh air. If symptoms persist, provide oxygen and obtain medical attention.

Skin: Contact is not expected to present a skin hazard. Wash exposed areas with mild soap and water. Consult physician if irritation persists.

Ingestion: Product is not expected to present significant ingestion hazard. If it does occur, watch the person for several days to make sure obstruction does not occur. Do not induce vomiting unless directed to by the physician.

Section 5: Physical Data

Fo rm: Products consist of rigid cellular foam blocks, boards, and shapes Colou r: W hite Odou r: Very slight hydrocarbon odour Boiling Point: N/A Melting Po int: Softens at 70 to 80 deg. Celsius Specific Gravity: (W ater = 1): 0.6 - 2.0 Vapour Pressure: N/A Volatile by Volume: <4% (pentane & water) Vapour D ensity: (Air = 1) N /A Evaporation Rate: None Solubility in W ater: Inso luble

Section 6: Fire & Explosion

Flash Point: >345 Deg. Celsius using ASTM Test method D 1929

Special Fire Fighting Instructions: Fire fighters should wear self-contained breathing apparatus and personal protective clothing (turn out gear) in a sustained fire.

Extinguishing Media: Water fog, carbon dioxide, dry chemical, foam should be used. Auto-ignition Temperature: 440 Deg. Celsius Min.

Usual Fire & Explosion Hazards: Burning may produc e dense black sm oke. Smo ke consists of carbon monoxide, carbon dioxide, styrene, hydrogen halide, nuisance particle, carbon (soot) and pentane. Other un determ ined hydro carbon fractions could be released in trace qu antities. Du st generated by fabrication (i.e., sanding, sawing, etc.) will increase fire hazard and should be handled according ly.

Section 7: Reactivity Data

Stability (Conditions to av oid): Product is stable. However, exposure to fire and high temperatures must be avoided.

Incompa tibility (Materials to avoid): Product will dissolve in hydrocarbons, esters, aldehydes and amines. **Hazardous Decomposition:** Primary combustion products include carbon monoxide, carbon dioxide, styrene, hydrogen halide, nuisance particle, carbon (soot) and pentane. Other undeterm ined hydro carbon fractions could be released in trace qu antities.

Hazardous Polymerization: W ill not occur.

Section 8: Exposure Controls/Personal Protection

General Control Measures for Hot-Wire Cutting:

Provide sufficient general and/or local exhaust ventilation to maintain exposure below permissible personal exposure limit (PEL), or threshold limit value (TLV) for combustion products from hot wire cutting. Use local e xha ust, w here poss ible, in c onfin ed or enclo sed place s. W ear a ppro ved s afety glasses/goggles and dust mask if mechanical fabrication is to take place.

Personal Protec tive Equipm ent:

Respiratory Protection: Use approved dust mask when sawing or sanding. Use approved NIOSH respirator when the PEL or TLV for combustion products from hot wire cutting, sawing, or sanding may be exceeded.

Skin Protection: Skin prote ction not n orm ally req uired . W ear g loves and/ or sle eves , if sen sitivity noted.

Eye Protection: Use approved safety glasses/goggles when sawing or sanding.

Section 9: Spill or Leak Procedures

Spill, Leak or Release Procedures: Normal good housekeeping should be observed. Material can be swept or picked up and placed into a suitable container for disposal.

Reportable Q uantity: None

Disposal M ethod: Recycle, incinerate (WT E) or landfill per local and provincial regulations.

Section 10: Disposal Considerations

General Prod uct Information : Material, if discarded, is not expected to be a characteristic hazardous waste.

Disposal Instructions: Dispose of waste material according to Local, State, Federal, and Provincial En vironm ent Reg ulations.

Section 11: Transportation Information

Shipping Name: Not regulated for transport Hazard Class: None UN/NA #: None Packing Group: None

Section 12: Special Precautions

Storage & Handling: Although expanded polystyrene contains a fire retardant additive, it is considered combustible and adequate protection from sources of ignition should be taken. **Comb ustibility Labeling:**

CAUTION: "THIS PRODU CT IS COMBUST IBLE. A PROTECTIVE BARRIER OR THERMAL BARRIER IS REQU IRED AS S PECIFIED IN THE AP PROP RIATE BU ILDING CO DE".

Section 13: MSDS Information

The information contained herein is provided as a general reference. Truefoam Ltd. believes the data set forth herein to be accurate and the information is given in good faith. Truefoam Ltd. makes no guarantee or warranty and does no t assume an y liability with respect to the accuracy or completeness of such information.
