

FOR HOMEOWNERS

REWARD WALL

**BUILD A HOME THAT'S STRONG, SAFE
AND ENERGY EFFICIENT.**

ARE YOU READY TO BUILD YOUR NEW HOME USING THE MOST ENERGY-EFFICIENT WALL SYSTEM AVAILABLE?

Reward Wall is an innovative concrete form system that replaces traditional wooden forms – allowing you to build a home that's energy-efficient, environmentally-friendly, sustainable, quiet and comfortable.

WHY SHOULD I CHOOSE REWARD WALL INSULATING CONCRETE FORMS (ICFS)?

COST-SAVINGS:

Homeowners save an average of 50-80% on heating and cooling costs.

QUALITY AND ENERGY EFFICIENCY:

The actual R-value of concrete and iForm is 22 but the effective R-value of concrete, iForm, air infiltration and thermal mass is 32+.

COMFORT:

The thick concrete core keeps your interior temperature steady all year round.

HEALTH:

By keeping moisture and air out, ICFs reduce the chances of allergens, dust and mold – keeping your home healthier for you and your family. Reward Wall ICFs also do not contain any off-gassing fumes (CFCs, HCFCs), odors, toxins or formaldehyde.

SAFETY:

During laboratory fire testing, the Reward Wall system proved to be self-extinguishing, expelled less than half the toxins of burning pine and resisted fire for up to four hours.

STRENGTH:

It can withstand winds up to 200mph and is the preferred product for storm shelters, basements and safe rooms.

LOWER ENERGY COSTS. LONGER COMFORT.

We believe in helping building owners save as much as possible. That's why we designed our products to reduce heating costs and protect the integrity and long-term comfort of both commercial and residential buildings.
